

Maximise your coldroom space with PORTABLE BULKHEADS

We also repair any portable bulkheads/chiller boards; all sizes and shapes. We will first inspect the damage and if repairable, we will provide you with an obligation free quote first! No need to purchase a new board every single time.

Any successful "multi-temp" trailer set-up system uses insulated barriers. These products are used to create multi-temp zones in your trailer. Zones provide protection needed for temperature sensitive cargo. Companies increase efficiency and profits by cutting down on spoilage or melting in. The insulated barrier is the ideal solution for transporting frozen, refrigerated, and/or dry products. Chiller Boards are known as freezer boards, freezer bunks, chiller bunks, load separators, temperature separators and cargo temperature separators.

You can choose chiller boards from our any of our high quality designs, universal or flexible fit design. We also offer custom designs to meet your specifications and each trailer's unique build. Equipment includes rugged, easy to install two piece track mount and tether systems.
